DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 1-6, 8-10 and 12-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to teach that the mixing of the well fluid occurs in the absence of a cross-linkant. Negative limitations which appear in the claim and not in the specification introduces new concepts, and violates the description requirement of 35 USC 112 first paragraph (Ex Parte Graselli 231 USPQ 393).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-7, 9-12, 14-16, 18-24 and 26-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Quattrini (3660287).

Application/Control Number: 09/901,444

Art Unit: 1712

Ĺ

Quattrini teaches a water based fluid which is used to remove deposits from wells, which comprises an ethanol amine and polyethylene glycol (see Examples 1 and 3).

5. Claims 1-7, 9-12, 14-16,18-21, 22, 23, and 26-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Muijs (5061386).

Muijs teaches a water based drilling fluid which can comprise an amine and a copolymer of ethylene oxide and propylene oxide, and further teaches brines which can comprise the amine and either polyethylene glycol or polypropylene glycol (see claims, and column 1, line 67 – column 3, line 2). In the case of the brine compositions B-H, applicants intended use as a well fluid does not distinguish the prior art (In re Pearson 181 USPQ 641).

6. Applicants amendment has distinguished over the prior art of Holtmeyer, Rose and Patel, but adds new matter as outlined above. New rejections under 35 USC 102 are also presented.
